

EMBARC online – Eureka Math Bay Area Regional Consortium

<http://embarc.online/course/index.php>

Choose grade level, then module, to find the following:

Topic quizzes

Topic A Quiz

Click pictures for
Grade 4 examples

An excellent resource if you prefer to have shorter assessments more frequently than mid-module and end-module assessments. Quizzes offer a variety of selected response & constructed response, and DOK levels.

Lesson videos

Video

These are great to help teachers understand the concepts for each lesson. These are not polished or fancy, but it's nice to hear someone else explain the work.

Lesson slideshows.

Google Slideshow

These were made by Washington teachers at Bethel School District and Sumner School District and are also on the EngageWA.wiki site with other fun goodies:

<https://engagewa.wikispaces.com/EngageNY+Washington+State+Math+Users+Group>

WARNING! These slideshows contain *every piece from every lesson*. Please use them as a *starting point* to deliver your instruction and make choices ahead of time regarding what students *really* need to be able to know and do by the end of the lesson. They are editable. So edit them. Make them work for you!

Howard County Public School System (Standards-based)
